<h1>About us</h1>

<p>We are a group of privacy campaigners who believe the internet should

 be free from state surveillance.  We developed haystak to be a fast and
```

comprehensive search engine because we were not satisfied with the ones

already on offer - they frequently indexed too few pages to be

particularly useful.   Haystak has a custom crawler developed

specifically for the darknet, and hence it is able to find all reachable

pages and index them.</p>

<p>Whilst we offer some premium services this is simply to cover our

costs - as you know, servers are not free sadly.  They would be if we

ran the world but we don't.</p>

<h1>Censorship</h1>

<p>Generally we don't believe in censorship, but we make an exception

for any content which is immoral or illegal for us to link to.  Examples

 would be child abuse and human trafficking.  If you find any of this

indexed in our engine click the report link and we'll remove it swiftly.</p>
